## LANGUAGES & FRAMEWORKS

<b>Expert</b>	Swift   //   iOS
<b>Proficient</b>	JavaScript, TypeScript, Java   //   Angular, NativeScript
<b>Familiar</b>	Dart, SQL, COBOL   //   Flutter

## PROFESSIONAL EXPERIENCE

### Native iOS & Web Engineer

*Bottle Rocket Studios (Dallas, Texas)*

*September 2019 - Present*

#### Duties

- Developing and delivering some of the most popular and highly rated apps to the Apple Store.
- Building native applications utilizing Apple's native language Swift, and cross platform web technologies utilizing Angular + NativeScript.

#### Apps

- **MoneyGram:** International money transferring app
- **Loanpal Pros:** Sales tool used by Loanpal partners and dealers that offers solar & battery financing to customers
- **MyFrontier:** Self-service tool for Frontier Communications customers
- **MaryKay:** E-Commerce app for customers to purchase MaryKay beauty supplies and find beauty consultants

### COBOL Developer

*NYS Office of Temporary and Disability Assistance (Albany, New York)*

*November 2018 - May 2019*

- Developed and maintained the legacy system for New York State's Welfare Management System (WMS) working primarily in Unisys OS 2200 COBOL. These programs process thousands of cases to determine their eligibility for Welfare Assistant Programs such as Medicaid, Food Stamps, and Housing Assistance.

### Java Developer

*NYS Department of Tax and Finance (Albany, New York)*

*January 2015 - November 2018*

- Developed internal and external web applications for the NYS Department of Tax and Finance using primarily JavaEE. These applications are used by all of New York State's taxpayers and tax preparers; processing millions of dollars a year in both revenue and refunds.

## EDUCATION

### Bachelor's of Science in Computer Science

*University at Albany, SUNY - Albany, NY*

*Graduated 2014*
